Brian LeDuc, Program Director

The meeting of the Integrated Justice Information Board on Tuesday January 18th is cancelled.

JIN Data Exchange (JINDEX)

I received comments from the Technical Advisory Group (TAG) on the Alternatives Report and Evaluation Criteria. I also received responses from Microsoft and Sonic to the technical questionnaire that I circulated last week, and have passed them on to TAG members for Tuesday's Q&A session. The TAG will also meet later that afternoon.

Summary Offender Profile (SOP)

Templar is working with AOC to validate that SOP is returning all relevant data from JIS, and I am grateful to AOC staff for their assistance. The connectivity and administration problems have been repaired, and I will try next week to set up accounts for the people at WSP who have expressed an interest in trying the application.

I met with Carolyn Brooks of the Attorney General's Office and Liz Palmer of the Department of Corrections on Friday to discuss their trial use of SOP. Carolyn thought that, although the application was easy to use, the strict parameters for SOP queries (Name, Date of Birth) did not fit well with her investigative work. Liz, however, did see value for DOC and we have begun plans for an expanded rollout to users in that agency.

Electronic Citations

Dirk Marler and I met with Senator Delvin and Representative O'Brien to discuss the draft legislation to abolish the requirement for signatures on citations. Jeff Devere of the WSP attended the first meeting, while Jeff Hall of AOC was present at the second, and also met independently with Senator Kline. Senator Kline, along with Representative O'Brien, agreed to sponsor the bill. We are scheduled to meet with Representatives Lovick, Pearson and Priest next week.

Miscellaneous

? Joe Lehman, one of JIN's biggest supporters, [announced](#) his resignation as Chief of the Department of Corrections. I am grateful for his assistance and counsel over the last two years.
